100. (1) All applications to the Legislative Assembly for Private Bills of any nature whatsoever shall require the publication of a notice clearly and distinctly specifying the nature and object of the application, and when the application refers to any proposed work, indicating sufficiently the location of the work, to be signed by or on behalf of the applicant.

(2) Such notice shall be published in *The British Columbia Gazette* and once a week in one leading daily newspaper freely circulating in all parts of the Province. The notice in such newspaper to appear on Wednesday of each week.

(3) When the proposed Bill is of such a nature that it may particularly affect one or more electoral districts, the notice shall furthermore be published once a week if possible in some newspaper in every electoral district affected, or if there be no newspaper published therein, then in a newspaper published in the electoral district nearest thereto.

(4) The publication of such notice shall in all cases be continued for a period of four weeks during the interval of time between the close of the next preceding Session and the consideration of the petition.

101. Every petition signed by an agent or attorney in fact shall be accompanied by the authority of such agent or attorney in fact, and the petition shall not be deemed to be filed with the Clerk until this is done.

Before any petition praying for leave to bring in a Private Bill for the erection of a toll bridge is received by the House, the person or persons intending to petition for such Bill shall, upon giving the notice prescribed by Standing Order 100, also at the same time and in the same manner give notice of the rates which they intend to ask, the extent of the privilege, the height of the arches, the interval between the abutments or piers for the passage of rafts or vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

103. (1) All Private Bills for Acts of incorporation shall be so framed as to incorporate by reference to the clauses of the general Acts relating to the details to be provided for by such Bills: Special grounds shall be established for any proposed departure from this principle, or for the introduction of other provisions as to such details, and a note shall be appended to the Bill indicating the provisions thereof in which the general Act is proposed to be departed from. Bills which are not framed in accordance with this Standing Order shall be recast by the promoters and reprinted at their expense before any Committee passes upon the clauses.

(2) Every Bill for an Act of incorporation, where a form of model Bill has been adopted, shall be drawn in accordance with the model Bill (copies of model Bills may be obtained from the Clerk of the House). Any provisions contained in any such Bill which are not in accord with the model Bill shall be inserted between brackets or underlined, and shall be so printed.

(3) Any exceptional provisions that it may be proposed to insert in any Bill shall be clearly specified in the notice of application for same.

107. All Private Bills shall be prepared by the parties applying for the same, and printed in small-pica type, 26 ems by 50 ems, on good paper, in imperial octavo form, each page when folded measuring 10½ inches by 7½ inches. There shall be a marginal number every fifth line of each page; the numbering of the lines is not to run on through the Bill, but the lines of each page are to be numbered separately. Three hundred copies of each Bill shall be deposited with the Clerk of the House immediately before the first reading. If amendments are made to any Bill during its progress before the Committee on Private Bills, or through the House, such Bill shall be reprinted by the promoters.

APPLICATION FOR PERMIT UNDER  
POLLUTION CONTROL ACT, 1967  
(Emissions)

*Preamble*—Burrard Thermal Generating Plant is an existing British Columbia Hydro and Power Authority facility and has operated since 1962. It operates on an intermittent basis to satisfy seasonal peak demand for electrical energy, to supplement hydro-electric generation during low-water years, and for emergencies.

The plant may be fuelled with natural gas or residual oil. The maximum emission levels sought under this application are for the most extreme operating condition foreseeable. This would arise when all six units operate at maximum output and the fuel is restricted to residual oil containing sulphur.

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (3) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

British Columbia Hydro and Power Authority, of 970 Burrard Street, Vancouver, B.C. V6Z 1Y3, hereby applies to the Director for a permit to discharge or emit contaminant(s) into the air from Burrard Thermal Generating Plant, located at Ioco, and gives notice of application to all persons affected.

2. The land upon which the works are located is Lot 219, Group 1, NWD (except

thereout, firstly that part of Sketch 4373, and, secondly, lot, Plan 18279, and Parcel J of Lot 256, Group 1, NWD, shown on official plan in Ministry of the Environment and on Reference Plan 15816, and lease of water lot sum of 1,080,200 square feet fronting part of District Lot 219 and southwesterly part of District Lot 256, Burrard Inlet, Group 1, NWD.

3. The discharge or emission shall be located within the boundaries of the properties described above in paragraph 2.

4. The rate of discharge is (dry basis): (a) Maximum, 1,800,000 SCFM; duration, continuous; frequency, continuous. (b) Average daily (based on normal daily operating period), indeterminate.

The operating period during which contaminant(s) will be discharged is as required for electrical generation.

5. The characteristics of the contaminant(s) to be discharged are total particulate, 0.07 gr/DSCF at 12 per cent CO<sub>2</sub>; NO<sub>x</sub> as NO<sub>2</sub>, 160 ppm; SO<sub>2</sub>, 1,050 ppm.

The type of treatment to be applied to the contaminant(s) is supplementary emission control for gaseous contaminants and additional low excess air combustion control for NO<sub>x</sub> installed on Unit 6.

I. R. J. Hannon, Registrar, hereby certify that a copy of this application has been received by the Greater Vancouver Regional District.

This application, dated on the 4th day of April 1977, was posted on the ground in accordance with the Pollution Control Regulations.
